Marios Kampouris
Full Stack Developer

Experienced fullstack developer with proven expertise, now transitioning towards front end specialization. Holding a degree in Information Technology from the International Hellenic University, I bring a solid foundation to my craft. Passionate about refining user interfaces to enhance digital experiences.

Experience

Apr 2023 - Present
MVI HELLAS I.K.E. · Full-time | Thessaloniki | Remote
Fullstack Developer

- Led the development of frontend applications employing Angular and backend systems with Java, ensuring smooth integration and top performance throughout the automotive sector. Also managed database operations to optimize data handling and system efficiency.
- Innovated and implemented new features while swiftly addressing and resolving software anomalies, fostering continuous improvement and enhanced user experience.
- Managed code effectively with Git for seamless collaboration.
- Utilized Jira and Agile methods for efficient project planning and execution.
- Created user-friendly documentation for easy understanding and usage.
- Fostered strong client relationships through regular meetings and discussions.
- Collaborated closely with clients for effective planning and tailored solutions in the automotive industry.

May 2022 - Apr 2023
EUROPEAN DYNAMICS · Full-time | Thessaloniki | Remote
Junior Java Web Developer

- Developed Java backend and Oracle Database solutions for efficient performance.
- Leveraged Ext JS framework and followed Model View Controller architecture to craft responsive and feature-rich frontend applications.
- Improved database operations and SQL queries for better system performance.
- Collaborated with teams to analyze requirements and implement solutions.
- Managed code efficiently with Git and GitHub.
- Generated dynamic reports with Jasper Reports.
- Played a significant role in software development within an Information Technologies service provider specializing in e-government solutions.

Oct 2021 - May 2022
Foodtec Solutions · Full-time | Thessaloniki | Hybrid
Quality Assurance

- Conducted manual testing for both mobile and web applications, ensuring product quality throughout multiple projects and products.
- Executed test cases meticulously to identify and document errors for troubleshooting.
- Performed API testing using tools like Postman to validate backend functionality.
- Collaborated with development teams to resolve identified issues and improve product reliability.
- Contributed to error documentation and troubleshooting efforts to enhance overall product quality and user experience.
- Played a pivotal role in quality assurance efforts for a solutions provider catering to the restaurant industry.
